POWER CORRECTION SYSTEMS INC.

SMALL, TURNKEY CEMENT PLANTS

WE BUILD:

1. Complete, turn-key, small Cement Plants worldwide
2. Plant capacities range from 100 to 600 tons per day
3. Large clinker grinding plants. Up to 1600 TPD

WE PROVIDE:

1. All the mechanical, electrical, laboratory and control equipment
2. Engineering, erection and commissioning
3. Training to the local operating personnel
4. When required by the customer, plant's managing and operating services

OUR STRENGTH:

1. We build complete, small turnkey plants at a fraction of a cost required for larger plants
2. Cost of finalized material is a fraction of that at larger plants due to state-of-the-art technology and lower usage of power and fuels per ton of cement produced
3. Capital recovery (project payback) is remarkably short
4. Complete plants could be operating in as little as 14 months after green lighting project
5. Smaller Cement Plants present investors with much quicker returns. Operating personnel required is a fraction of that at large plants
6. New small Cement Plants fulfill a socio economic function as they generate employment and local revenues. Local incentives and tax breaks may accelerate investment's payback
7. Maintenance and operation of smaller plants are virtually trouble free
8. Local operating personnel are given full training to operate Cement plant in a cost effective manner
9. We'll continue to render assistance throughout the Plant's operating life
10. Our team is composed of highly trained cement technologists

WE WORK WITH:

1. We primarily work with major industrial investors, construction companies, regional development banks and government entities worldwide seeking to further develop the industrial base of their respective countries
2. In addition to technical details, we also present cost/benefit analysis tailored to reflect local conditions
